

MICHAEL R. ROBINSON

Azure Architecture and Engineering Manager | DoD Cloud Modernization & Secure Architecture

CLOUD ARCHITECT SUMMARY

Cloud architect with 20+ years across DoD mission environments. I design secure cloud platforms, build DevSecOps pipelines, and lead modernization efforts for mission-critical systems in regulated IL4/IL5/IL6 contexts.

CORE ARCHITECTURE & CLOUD SKILLS

Cloud Platforms

Azure Government (IL5/IL6) • AWS (Gov & Commercial) • OCI & GCP (Cloud One Exposure)

Architecture Domains

Enterprise Cloud Architecture • Secure Landing Zones • Network & Identity Architecture • Zero Trust Alignment • Hybrid & Multi-Cloud Design • Governance & Policy Architecture

DevSecOps & Automation

Terraform • ARM Templates • GitHub • Azure DevOps • Jenkins • CI/CD Security Integration • Infrastructure as Code (IaC) Governance • Secure Pipeline Design

Security & Compliance

RMF • ATO Support & Sustainment • DoD SRG • SCCA • NIST 800-53 • DISA STIGs • POA&M Management • Continuous Compliance Engineering

Leadership & Delivery

Technical Authority • Architecture Reviews • Trade Studies • White Papers • Senior Leadership Briefings • Agile / Kanban • Cross-Functional Engineering Leadership

PROFESSIONAL EXPERIENCE

Azure Architecture and Engineering Manager Leidos - USAF Cloud One ACSS Program | Remote

2026-03 to Present

Lead Azure architecture and engineering for the U.S. Air Force Cloud One Architecture and Common Shared Services (ACSS) multi-cloud environment spanning Azure, AWS, Google, and Oracle.

Responsibilities

Design scalable, resilient, and secure Azure architectures and reference patterns for the Cloud One multi-cloud environment.

Manage and mentor a team of cloud engineers delivering secure, cloud-native shared services across IL4/IL5/IL6 workloads.

Drive adoption of DevSecOps practices, infrastructure as code, and automation using Terraform, Ansible, Jenkins, and Kubernetes.

Architect secure cloud solutions implementing zero-trust principles and defense-in-depth across IL4/IL5/IL6 boundaries.

Impact

Advancing standardized, secure Azure reference architectures and DevSecOps automation across the Cloud One environment to strengthen USAF system resiliency, security, and cost effectiveness.

Senior Cloud Cyber Security Engineer - Lead

SAIC – Cloud One Program | Remote

2023-01 to 2026-02

Serve as senior cybersecurity engineer supporting the Cloud One Common Computing Environment—a globally distributed hybrid cloud hosting mission-critical USAF and Army workloads.

Responsibilities

Lead vulnerability triage and remediation planning across virtualized, containerized, and cloud-native systems.

Produce SAP, SAR, and POA&M artifacts supporting RMF and authorization workflows.

Implement and validate controls aligned to NIST 800-53, SRGs, STIGs, and DoD 8500/8510 guidance.

Integrate security checks into CI/CD pipelines and advise system owners through RMF lifecycle sustainment.

Impact

Established repeatable security inheritance patterns and improved compliance velocity while sustaining operational security across IL4/IL5/IL6 systems.

Cloud Architect

SAIC – USCENTCOM J6 | MacDill AFB, Tampa, FL

2022-01 to 2023-12

Led architecture for CENTCOM cloud modernization and initial Azure Government IL5/IL6 adoption, balancing mission delivery with strict security and compliance requirements.

Responsibilities

Designed secure enterprise cloud landing zones aligned to SRG, RMF, and SCCA requirements.

Architected DevSecOps workflows and standardized infrastructure templates.

Designed lakehouse analytics patterns with Azure Synapse and medallion architecture.

Produced technical trade studies and migration recommendations for mission owners.

Impact

Enabled CENTCOM's first scalable cloud architecture baseline with consistent governance, faster delivery, and improved mission analytics enablement.

Innovations Engineer, Cloud and Modernization

SAIC – USCENTCOM J6 Technology Innovation Branch | MacDill AFB, Tampa, FL

2020-01 to 2022-12

Advised CENTCOM J6 modernization initiatives by evaluating emerging technologies and mapping them to secure, interoperable adoption paths.

Responsibilities

Conducted technical evaluations of cyber, cloud, and network capabilities.

Authored briefs and analysis for senior leadership and mission planners.

Supported IL5/IL6 migration efforts and ATO-related engineering activities.

Coordinated architecture alignment across matrixed engineering teams.

Impact

Helped define a practical modernization roadmap that advanced cloud adoption while meeting security, interoperability, and mission constraints.

Senior Cyber Infrastructure Analyst

SAIC – USCENTCOM | MacDill AFB, Tampa, FL

2017-01 to 2020-12

Designed and sustained cybersecurity boundary infrastructure for USCENTCOM headquarters and operational theater networks.

Responsibilities

Engineered and maintained firewalls, IDS/IPS, and filtering infrastructure.

Led planning for CND tool migration to JRSS and modernization tracks.

Built an automated cyber range in Azure Gov IL2 for experimentation.

Delivered leadership briefings on risk posture and modernization impacts.

Impact

Improved resilience, compliance, and testing velocity for cyber defense capabilities supporting mission operations.

Network Operations SME, Senior

CACI / L3 NSS – USAF Southwest Asia AOR | Shaw AFB, SC

2011-01 to 2017-12

Led Tier 2/3 network operations and engineering for USAF infrastructure serving multiple bases in Southwest Asia.

Responsibilities

Supported WAN, VoIP, routing, switching, and data center platforms.

Designed and maintained BGP/OSPF/EIGRP/MPLS topologies.

Managed ACS, AD integrations, and enterprise firewall clusters.

Implemented cybersecurity hardening on network and Windows infrastructure.

Impact

Maintained mission-critical availability and improved security posture across large-scale distributed network operations.

Network Operations Technician

L3 NSS – USAF Enterprise Network | Shaw AFB, SC

2010-01 to 2011-12

Delivered Tier 0–2 operational support for core network, identity, and security services in USAF enterprise environments.

Responsibilities

Troubleshoot WAN, DNS, routing, and firewall incidents.

Applied DoD-approved router/switch configurations.

Supported AD/GPO operations and Windows hardening standards.

Provided remote support to comm squadrons across installations.

Impact

Improved service reliability and baseline security for critical network operations supporting NIPR and SIPR environments.

0651 Data Network Specialist

United States Marine Corps, 3rd Marine Division | Kaneohe Bay, HI

2000-01 to 2004-12

Provided network and systems support for mission-critical military communications across classified and unclassified environments.

Responsibilities

Delivered remote and on-site support for Windows and UNIX users.

Maintained SIPR/NIPR communications and user services.

Managed accounts, permissions, and workstation support.

Supported field exercises and deployments with communications operations.

Impact

Contributed to stable communications posture and operational readiness in high-demand military environments.

EDUCATION

Bachelor of Science in Computer Engineering & Technology from Middle Tennessee State University (MTSU), Murfreesboro, TN, with a minor in Computer Science. Coursework covered embedded systems programming, digital logic design, and software development — the education that preceded cloud architecture and cybersecurity work across DoD mission environments.

CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert

Microsoft Certified: Azure AI Engineer Associate

AWS Certified Solutions Architect – Associate

CompTIA Security+

Cisco CCNP / CCNA Security / CCNA Data Center

ITIL v3 Foundation
