

Michael R. Robinson

Azure Architecture & Engineering Manager | DoD Cloud Modernization & Secure Architecture

727-313-1018 · michaelrobinsonjr@gmail.com · St. Petersburg, FL · Remote / Relocation Eligible · linkedin.com/in/michaelrobinsonjr

PROFESSIONAL SUMMARY

Cloud architect with 20+ years across DoD mission environments and deep hands-on experience designing, delivering, and securing Azure Government cloud architectures at IL5/IL6. Proven leader in cloud modernization, DevSecOps enablement, RMF-aligned architecture, and ATO-ready cloud platforms. Trusted technical authority for senior government stakeholders, bridging mission requirements, security governance, and scalable cloud design across hybrid and multi-cloud environments.

CORE ARCHITECTURE & CLOUD SKILLS

Cloud Platforms	Azure Government (IL5/IL6) · AWS (Gov & Commercial) · OCI & GCP (Cloud One Exposure)
Architecture Domains	Enterprise Cloud Architecture · Secure Landing Zones · Network & Identity Architecture · Zero Trust Alignment · Hybrid & Multi-Cloud Design · Governance & Policy Architecture
DevSecOps & Automation	Terraform · ARM Templates · GitHub · Azure DevOps · Jenkins · CI/CD Security Integration · Infrastructure as Code (IaC) Governance · Secure Pipeline Design
Security & Compliance	RMF · ATO Support & Sustainment · DoD SRG · SCCA · NIST 800-53 · DISA STIGs · POA&M Management · Continuous Compliance Engineering
Leadership & Delivery	Technical Authority · Architecture Reviews · Trade Studies · White Papers · Senior Leadership Briefings · Agile / Kanban · Cross-Functional Engineering Leadership

PROFESSIONAL EXPERIENCE

Azure Architecture & Engineering Manager2026 – Present

Leidos – USAF Cloud One ACSS Program · Remote

Lead Azure architecture and engineering for the U.S. Air Force Cloud One Architecture and Common Shared Services (ACSS) multi-cloud environment spanning Azure, AWS, Google, and Oracle.

- Define scalable, resilient, and secure Azure reference architectures for the Cloud One multi-cloud environment
- Establish defense-in-depth security models implementing zero-trust principles across IL4/IL5/IL6 boundaries
- Drive adoption of DevSecOps practices, infrastructure as code, and automation using Terraform, Ansible, Jenkins, and Kubernetes
- Manage and mentor a team of cloud engineers delivering secure, cloud-native shared services across IL4/IL5/IL6 workloads
- Establish engineering standards and best practices for cloud architecture and DevSecOps implementation
- Advance standardized, secure Azure reference architectures and DevSecOps automation to strengthen USAF system resiliency, security, and cost effectiveness

Senior Cloud Cyber Security Engineer – Lead2023 – 2026

SAIC – Cloud One Program · Remote

Served as senior cybersecurity engineer supporting the Cloud One Common Computing Environment—a globally distributed hybrid cloud hosting mission-critical USAF and Army workloads.

- Defined inheritable security control frameworks aligned to NIST 800-53, SRGs, STIGs, and DoD 8500/8510 guidance
- Led vulnerability triage and remediation planning across virtualized, containerized, and cloud-native systems
- Produced SAP, SAR, and POA&M artifacts supporting RMF and authorization workflows
- Integrated security checks into CI/CD pipelines and advised system owners through RMF lifecycle sustainment

- Established repeatable security inheritance patterns to improve compliance velocity across IL4/IL5/IL6 systems
- Improved operational security posture and compliance throughput while sustaining defense-in-depth across hybrid cloud environments

Cloud Architect

2022 – 2023

SAIC – USCENTCOM J6 • MacDill AFB, Tampa, FL

Led architecture for CENTCOM cloud modernization and initial Azure Government IL5/IL6 adoption, balancing mission delivery with strict security and compliance requirements.

- Designed secure enterprise cloud landing zones aligned to SRG, RMF, and SCCA requirements
- Architected DevSecOps workflows and standardized infrastructure templates for IL5/IL6 provisioning
- Designed lakehouse analytics patterns with Azure Synapse and medallion architecture
- Produced technical trade studies and migration recommendations for mission owners
- Enabled CENTCOM's first scalable cloud architecture baseline with consistent governance, faster delivery, and improved mission analytics enablement
- Embedded automated compliance validation within CI/CD workflows for continuous security posture monitoring

Innovations Engineer – Cloud & Modernization

2020 – 2022

SAIC – USCENTCOM J6 Technology Innovation Branch • MacDill AFB, Tampa, FL

Advised CENTCOM J6 modernization initiatives by evaluating emerging technologies and mapping them to secure, interoperable adoption paths.

- Conducted technical evaluations of cyber, cloud, and network capabilities for mission applicability
- Authored briefs and analysis for senior leadership and mission planners
- Supported IL5/IL6 migration efforts and ATO-related engineering activities
- Coordinated architecture alignment across matrixed engineering teams
- Helped define a practical modernization roadmap that advanced cloud adoption while meeting security, interoperability, and mission constraints

Senior Cyber Infrastructure Analyst

2017 – 2020

SAIC – USCENTCOM • MacDill AFB, Tampa, FL

Designed and sustained cybersecurity boundary infrastructure for USCENTCOM headquarters and operational theater networks.

- Engineered and maintained firewalls, IDS/IPS, and filtering infrastructure across HQ and deployed environments
- Led planning for CND tool migration to JRSS and modernization tracks
- Built an automated cyber range in Azure Gov IL2 for experimentation and training
- Delivered leadership briefings on risk posture and modernization impacts to senior stakeholders
- Improved resilience, compliance, and testing velocity for cyber defense capabilities supporting mission operations

Network Operations SME – Senior

2011 – 2017

CACI / L3 NSS – USAF Southwest Asia AOR • Shaw AFB, SC

Led Tier 2/3 network operations and engineering for USAF infrastructure serving multiple bases in Southwest Asia.

- Designed and maintained BGP/OSPF/EIGRP/MPLS topologies across distributed USAF installations
- Managed ACS, AD integrations, and enterprise firewall clusters
- Implemented cybersecurity hardening on network and Windows infrastructure
- Supported WAN, VoIP, routing, switching, and data center platforms
- Maintained mission-critical availability and improved security posture across large-scale distributed network operations

Network Operations Technician

2010 – 2011

L3 NSS – USAF Enterprise Network • Shaw AFB, SC

Delivered Tier 0–2 operational support for core network, identity, and security services in USAF enterprise environments.

- Troubleshoot WAN, DNS, routing, and firewall incidents
- Applied DoD-approved router/switch configurations
- Supported AD/GPO operations and Windows hardening standards
- Improved service reliability and baseline security for critical network operations supporting NIPR and SIPR environments

0651 Data Network Specialist

2000 – 2004

United States Marine Corps, 3rd Marine Division • Kaneohe Bay, HI

Provided network and systems support for mission-critical military communications across classified and unclassified environments.

- Delivered remote and on-site support for Windows and UNIX users
- Maintained SIPR/NIPR communications and user services
- Managed accounts, permissions, and workstation support
- Contributed to stable communications posture and operational readiness in high-demand military environments

EDUCATION

Bachelor of Science – Computer Engineering & Technology

Minor: Computer Science • Middle Tennessee State University
